## CREATIVE TEXTURES

### PART I

Using water colors or paints, create one of the textures described below on an 8 1/2 X 11 sheet of cardstock.

1. **STIPPLING:** Apply paint with a very stiff brush repeatedly to produce a soft finish and eliminate brush marks.
2. **SPONGING:** Use the same process as stippling, but use a sponge, rag, crumpled paper, cloth, etc.
3. **MOTTLING OR SPATTERING:** Flip paint onto a base coat with a paint brush or toothbrush to get a speckled effect. You may use one or many colors. This is great for covering cracks or flaws in a wall.
4. **MISTING:** Spray a mist with a spray gun to produce fine, uniform spots.
5. **COLOR WASH:** Apply a thinned paint or glaze over a paint of another color. For a streaked effect, wipe some of the glaze off while it is wet, leaving some of the glaze.

### PART II

Experiment and create an original texture that could be used on walls or ceilings. Mount and label the sample, explaining the procedure you used.
