Name

Static Electricity Answer the following questions based on what you have learned from the activities you have done today with the balloon and tissue paper.	
2.	Would the paper have done the same thing if the balloon had not been charged? Why or why not?
3.	What other materials other than hair and wool will create a charge on the balloon?
4.	Explain what happens when two balloons with like charges are brought near each other. What causes this?
