Sewing Factory

North Layton Jr. High TLC

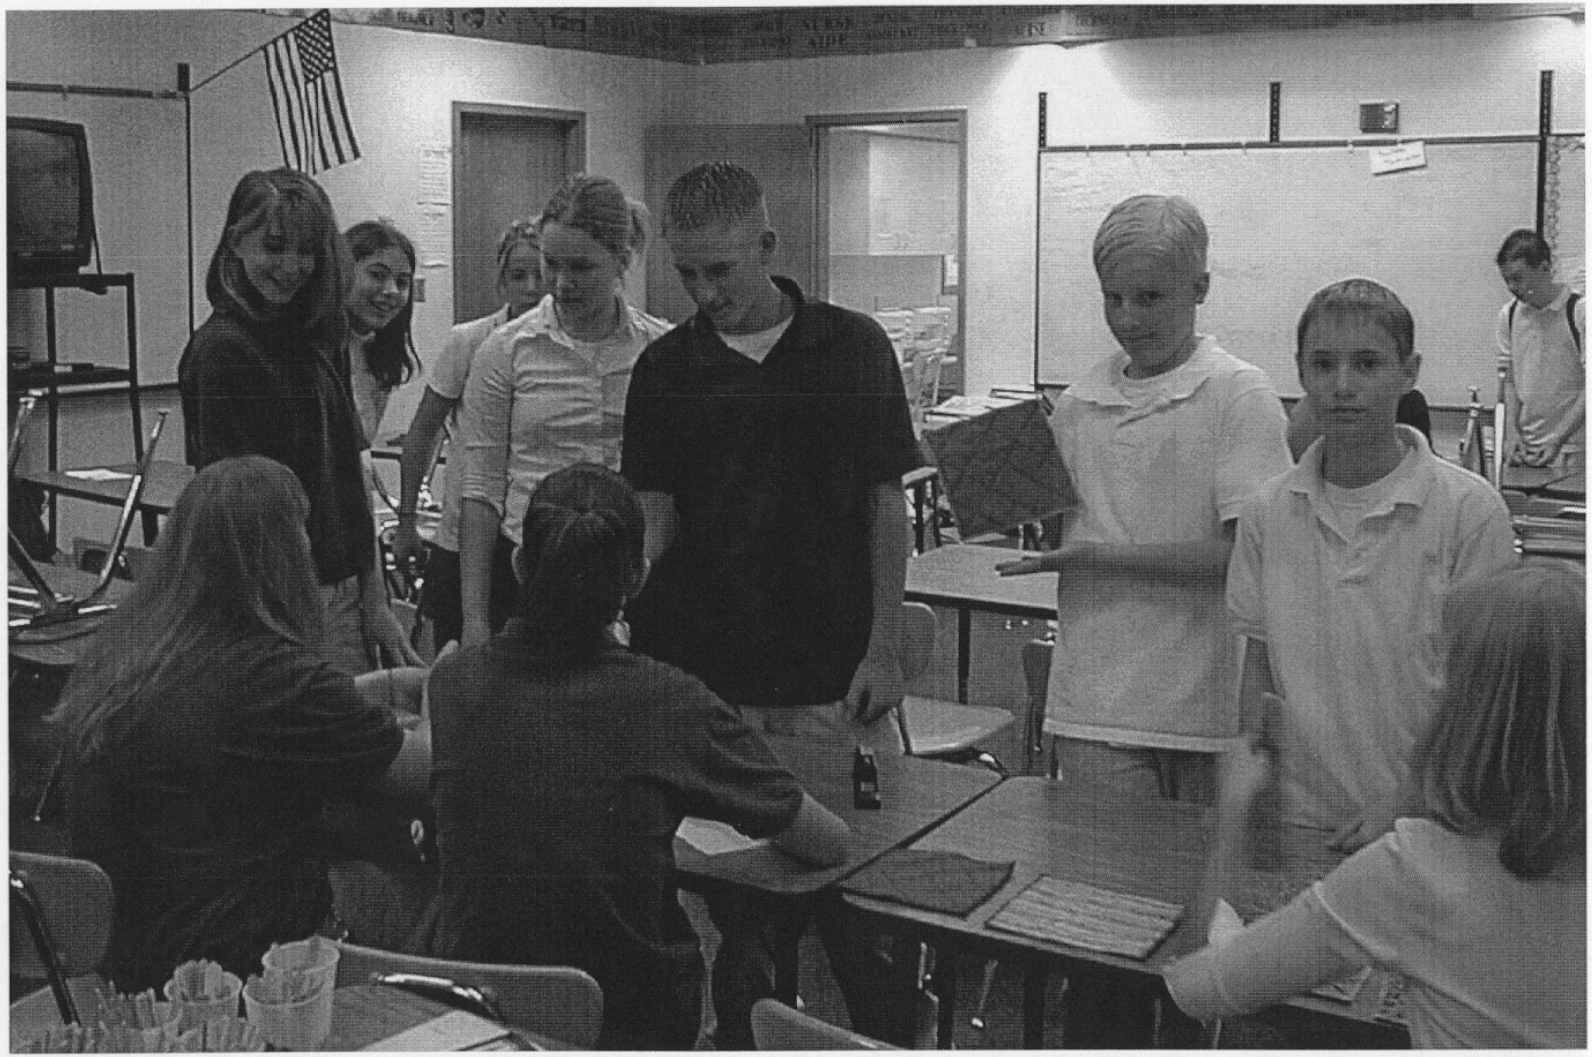

Objective: Students will gain practical experience in assembly lines and the job possibilities by running a sewing factory simulation

- Overview: Students will learn what job is available, fill out job applications, be assigned a job based on their application and previous sewing ability, work at that job for two days, fill out a piece rate sheet, figure their wages, and then evaluate the profitability of the business with the class

What the Student can learn as a result of this activity

- Jobs are earned on the basis of applications, grades, and sometimes skill tests (reinforcing what is taught in career development)
- How an assembly line is set up
- Everyone has to do his job in order for the assembly line to work
- Sometimes you can accomplish more through teamwork than individually
- How their personality is suited to the teamwork concept
- How the job market is influenced by the global economy
