

## **SIX POINTS OF DANGER**

Using the six points of danger and the graphic provided, make a bulletin board displaying the six main points of danger inside and outside for children. They are:

- Burns
- Sharp objects
- Poisoning
- Choking (small objects)
- Drowning
- Automobiles

Discuss these six points of danger with the students and have the students memorize them. If they can remember these six simple points, they can be more aware of these dangers and have a better chance at preventing accidents. Have the students complete the Six Points of Danger section found beneath the Safety Checklist on the Childcare Safety worksheet.
