10%

## CHAPTER 6

ET-10

# Roof Styles

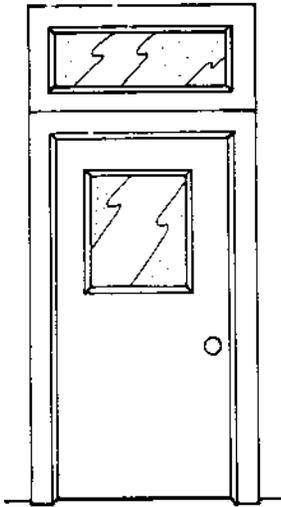

A specific architectural style is characterized by a collection of design details. These details include the size and shape of windows, the size and placement of a porch, and the presence or absence of columns. One of the design details that is usually considered a major characteristic of a housing style is the roof. The illustrations below show several distinct roof styles. Try to identify each one before checking the key below for correct answers.

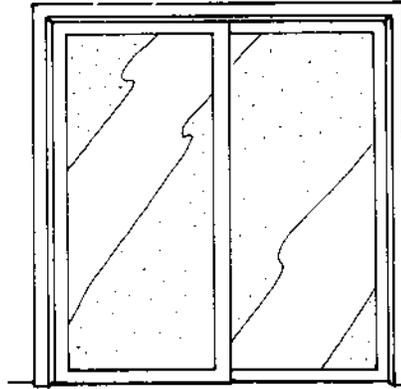

## Thinking It Over

1. Which of these roof styles are represented in your community?
