

Read the following CASE STUDY and list the various influences in the correct column below:

Sammy has brown eyes and is five-years-old. she attends a neighborhood preschool everyday. her teachers have fallen in love with her witty personality and honey-colored hair. She is very intelligent and does well with the tasks assigned her. Sammy's parents are divorced and she misses her father very much. Sammy has juvenile arthritis and must see the doctor often., At her last doctor's visit, the doctor reminded Sammy's mom that diabetes has run in her family for several generations and that Sammy should be watched closely for any early symptoms of diabetes. Sammy's growth chart shows that she will probably be small for her age.
