

Accounting-Analyzing Transactions to Debit/Credit Parts

Summary

Introduction of how transactions are analyzed in T accounts with debits and credits. How different accounts increase with a debit and decrease with a credit, as well as some decrease with a debit and increase with a credit. Analyze each of the following transactions discussed so far: receiving cash from the owner of a proprietorship as an investment, paying cash for supplies, paying cash for insurance, buying supplies on account, paying cash on an account, receiving cash from sales, paying cash for an expense, paying cash to an owner of a proprietorship for personal use.
