

How Much Water Do You Use? Webquest

Summary

By accessing the website [Conserve Water](#), students will learn about water usage and the importance of conservation.

Time Frame

1 class periods of 70 minutes each

Group Size

Individual

Materials

- a computer per student (or one computer for every 2-3 students)
- [one student sheet per student](#)
(attached)

Background for Teachers

Utah is the second driest state in the country. We live in a desert with a state average of about 13 inches of precipitation per year. Our government has a program educating the public about water conservation because of the lack of water here. By accessing the website [Conserve Water](#), students will learn about water usage and the importance of conservation.

Student Prior Knowledge

Basic background of water cycle, understanding of Utah's water situation.

Instructional Procedures

- Reserve a computer lab or check out a mobile lab.
- Pass out worksheet.
- Explain assignment. Allow class time for independent working time. Assist as needed.

Assessment Plan

Scoring Rubric or answer key:

An answer key can be made by accessing the website and filling in the answers. Many of the answers will vary.

Bibliography

Lesson Design by Jordan School District Teachers and Staff.
