

My Buddy

Summary

Students will research about a symbiotic relationship between 2 organisms. They will then present their relationship to the class. In a charades type format.

Main Core Tie

Science - Biology

[Standard 1 Objective 3](#)

Time Frame

2 class periods of 60 minutes each

Group Size

Individual

Materials

- [names of animals in symbiotic relationships](#)
(attached) encyclopedias or computers with Internet access

Student Prior Knowledge

Students should be introduced to symbiotic relationships.

Instructional Procedures

As students walk into the classroom let them choose a piece of paper that has the name of an organism on it. The organisms are printed below.

Instruct student that the organism they have chosen participates in a symbiotic relationship with another organism in the classroom.

Students should research their organism on the Internet or from the books to find their partner in the classroom.

They should write a paragraph describing this relationship

After 30 minutes of research you may want to help students who are struggling to find their match in the classroom

Students should then practice acting out their relationship with their "buddy".

Gather as a class. Play charades with each pair acting out their relationship silently. The other students should try to guess the type of symbiotic relationship and describe the relationship.
