

Subject: Nearpod Agreement
Date: August 12, 2020

Dear Educator,

We are extremely pleased to report that we now have a statewide agreement with Nearpod. Supporting Utah teachers and students, particularly with planning for uncertain scenarios during the coming school year, remain a priority for us. This is a five-year agreement paid with UETN's congressional CARES Act funding, through the Utah legislature and executive branch leaders.

We are grateful to partner with all of you and will continue to keep you posted about upcoming training opportunities and other Nearpod news. To that point, Nearpod has just launched a new interactive video platform that uses the magic of Nearpod to shift video from passive learning to an active learning experience. The new video platform is included in our agreement. Find out more information [here](#).

If your district or school has already completed a participation agreement there is nothing more you need to do. If your district has not signed the participation agreement, one administrator from your district should [click here](#) to request it. Additional training opportunities and a link to the Nearpod Utah Listserv are located on the [UEN Nearpod website](#).

Nearpod and UEN look forward to our partnership with every school in Utah.
Best Wishes,
